

MQB 1.8T/2.0T Gen 3 Carbon Fiber Air Intake System

One-Piece Design for Optimal Flow

034Motorsport's Carbon Fiber Air Intake System features a one-piece tube design to eliminate flow disruptions between the air filter and turbocharger inlet to minimize turbulence and pressure drop through the intake tract.

High-Quality Carbon Fiber Construction

The carbon fiber weave for the MQB 1.8T/2.0T Gen 3 Air Intake was carefully selected to match OEM engine trim found in Audi's RS models, providing OEM+ looks and fitment while preventing heat transfer from the engine bay.

Direct Connection to Turbocharger Inlet

034Motorsport's Carbon Fiber Air Intake System maximizes flow by eliminating unnecessary couplers, and incorporating smooth transitions from the 4.00" diameter air filter all the way back to the 2.75" diameter turbo inlet.

Integrated Secondary Air Injection Port

The 034Motorsport MQB Audi/Volkswagen EA888 1.8T/2.0T Gen 3 Carbon Fiber Air Intake System showcases a modular design to accommodate cars with or without Secondary Air Injection. No extra fittings or breather filters are required!

Retains Factory Lower Airbox

034Motorsport's One-Piece Carbon Fiber Air Intake System bolts directly to the factory lower airbox and inlet duct to provide the turbocharger with air taken from the front of the vehicle. This allows the intake to draw in cool, dense air without disrupting flow to other parts of the engine bay.

High-Flow 4" Diameter Cone Filter

034Motorsport's engineers designed the Carbon Fiber Upper Airbox to house a high-flow pleated cotton filter with a massive 4" diameter inlet, which is capable of supporting over 600 horsepower while providing excellent filtration.

The X34 Carbon Fiber Audi MQB Cold Air Intake System for 8V Audi A3/S3 & MkVII Volkswagen Golf/GTI/R equipped with 1.8T/2.0T Gen 3 engines has arrived! This true cold air intake yields horsepower and torque gains throughout the powerband, with peak gains of up to 15 crank horsepower and 12 ft-lbs of torque with the factory turbocharger.

034Motorsport's engineers thoroughly evaluated the factory airbox design to create a performance replacement that reduces pressure drop in the intake tract, while offering OEM+ fit and finish. The result is this complete one-piece MQB Carbon Fiber Air Intake Upgrade, which offers 100% bolt-on installation without the need for any additional pieces.
